Northern Virginia Mental Health Institute has utilized volunteers since the institute opened in 1968.

As a volunteer you are able to share skills, interests and special knowledge with our clients.

Volunteers have shown that people in the community want to support our clients during their rehabilitation and recovery.

There are many opportunities available at NVMHI such as, special events, working with the patients directly, and clerical positions. Orientations and training are held periodically through the year.

For more information and dates of orientations please call:

Sandra Smith,
Director of Volunteer Services
